BALL BEARING FACTORY, FOUNDRY CONSTRUCTED IN HUNGARY

BUILD BALL BEARING FACTORY-- Budapest, Esti Budapest, 15 Apr 53

The Keletmagyarorszag Golyoscsapaggyar (East Hungarian Ball Bearing
 Factory) is being constructed on a sand dune opposite the public cemetery (kocsmeto)
 on the outskirts of Debrecen.

Groundwork for the factory began in October 1952, and today the large office
 building, the forge, the woodworking shop, and the main shop are partially
 completed.

A special shed has been built on the site to prepare the largest concrete
 units ever produced in Hungary.

Although the work is impeded by frequent sandstorms, and by breaches of
 discipline, the party has promised that the factory will be producing before the
 end of the current Five-Year Plan.

SOROKSAR IRON FOUNDRY NEARS COMPLETION-- Budapest, Magyar Nemzet, 11 Nov 52

The Soroksari Vasontode (Soroksar Iron Foundry) is being built beyond the
 railroad crossing on the outskirts of Soroksar, near the highway leading to
 Kecskemet.

Planned as one of the most modern and most completely mechanized foundries
 in Europe, it will have a casting bay measuring 115 meters by 130 meters. The
 bay, which is being assembled of prefabricated concrete blocks, will house 24
 cranes.

Work is expected to begin in July 1953.
